Treading new paths together.

Integrated management systems

Efficiency, adherence to deadlines and stable processes are the cornerstones of quality. The recognition and prevention of potential causes of error begins with professional consultation. Our quality shines through in our creativity and efforts towards continuous improvement. We offer tailor-made, optimized solutions for this, with:

- **The global introduction of management systems for quality, the environment and occupational health and safety in accordance with the standards ISO 9001, VDA 6.x, TS 16949, UM 14001 and OHSAS 18001 etc.**
- **Staff qualification and training in QM methods and techniques**
- **Identifizierung, analysis and minimization of risks**
- **Auditing, internal/external potential and process analyses**
- **Cost reduction through efficient project and quality management**
- **Supplier management and development**
- **Troubleshooting & task force callouts**
- **Provision of qualified staff to cover shortages (time-based management)**

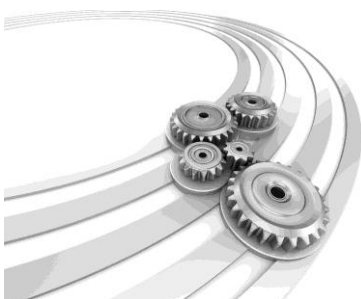

Engineering

We see reacting flexibly to our customers needs as part of our job. We reduce the causes of error we detect by means of systematic planning and consistent collaboration with our customers. We fulfill our customers wishes with professionalism, flexibility, expertise and team spirit.

We provide:

- Project management
- Resident engineering
- Consultation, planning and assembly of machine/plant construction and production
- Planning, advertisement, management of building construction projects, technical building services, fire safety and energy consulting
- Planning and optimization of packing and logistics processes
- Coaching and training
- Error analyses (Six Sigma)

NIC GmbH supports you by providing a partner with the highest levels of expertise and experience. In order to ensure your project is realized just how you imagined, we support and accompany you throughout the entire process, from the conception phase to commissioning. We attach great importance to process analysis and optimization during the planning phase in order to increase our customers efficiency. Our staff receive constant training in accordance with the latest standards.

Industry Service Provider (ISP)

By drawing up an individual plan of action for each project, we avoid friction losses and costs that would arise from reworking or repeat work. If machines or production lines need relocating, we take care of every aspect of this for you. Starting with project planning and consultation, our services cover the entire process: disassembly, packing, re-assembly, commissioning, servicing and documentation.

From cabling through to commissioning:

Our industrial electricians are responsible for all the necessary aspects of the entire installation, and for the electronic components of automated machines and systems.

Automation technology with Simatic S7:

Our technical experts possess knowledge and experience in the automation of the different processes. Programming, process optimization and commissioning are all included in the scope of service.

Piping construction:

In the area of piping construction we also offer possible applications for all branches of industry in line with your individual needs. We are well prepared to cope with a variety of requirements.

Assembly:

Our team is made up of specialists in the following fields:

- Metalwork
- Welding technology (WIG and E, MIG, MAG),
- Hydraulics
- Pneumatics
- Measuring and control technology
- Electrical technology

Sales

As an ISP in machine and plant construction as well as many other fields, NIC GmbH also relocates production sites. This sometimes includes maintaining machine and plant components and bringing them in line with the latest technical standards. Optimization of processing machines is a particularly important part of our services. We currently possess machines and plants that are distributed worldwide.

Everything from a single source:

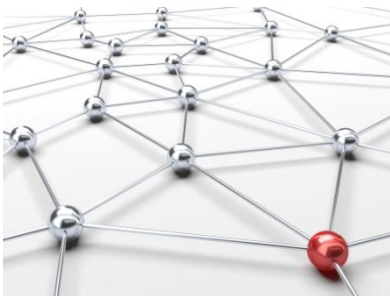

The used machines and plants we sell can be adapted to your product and production conditions for use as “turn-key” solutions. As such, our customers receive an all-in-one solution: disassembly, packing, re-assembly, commissioning, servicing/maintenance and documentation.

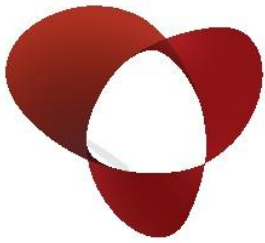

Maschinenauswahl:

- Machine tools
- Transfer systems
- Production plants
- Assembly plants
- Handling machines
- Rotary tables
- Machining centers
- Packing plants

Industries:

- Mechanical engineering
- Electronics industry
- Photovoltaic
- Foundry technology
- Automotive industry
- Packaging industry
- Food and beverage industry
